SERVICE SOLUTIONS FROM A VALUED PARTNER

MOTIVAIR'S CRITICAL COOLING GLOBAL SERVICES (CCGS) offers the product services and support needed for your mission critical facility.

The value of scheduled preventative maintenance goes well beyond the original service contract. It signifies a commitment to minimizing and even preventing costly downtimes through comprehensive analysis and routine maintenance to help create maximum uptime and system reliability.

The CCGS team's commitment to our customers is simple in that we aim to provide the highest quality product and overall customer experience. We have dedicated resources whose sole purpose is to support our products and everything related to those products.

Whether it is our free over-the-phone technical specialists, our site survey team or our installation group, every aspect of the Motivar's CCGS team is designed to enhance your product experience from day one and forward.

EXPERIENCE

With over 30 years in business, Motivair has established itself as a world-class supplier of critical cooling equipment. We understand the intricacies of chilled water systems both inside and outside your mission critical facility, which gives us a unique understanding of how your building operates.

KNOWLEDGE

We take pride in being able to help and support our clients by sharing the combined knowledge of our dedicated team. Each client and each project have unique and individual needs, however the common denominator is often the same; the goal is a seamless transition from procurement to implementation, an area our installation services team is well versed in.

AVAILABILITY

Our global service group is always backed by our dedicated service support technicians whenever it's needed. Whether you're looking for advice on system adjustments or scheduling a routine maintenance, our Critical Cooling Global Services team is here to help.

SINGLE SOURCE RESPONSIBILITY

Whether you are looking for a simple product installation or to engage our services team from site survey to engineering to design, our services team can handle any level of involvement that you are looking for.

WHY ROUTINE MAINTENANCE IS CRITICAL

All critical cooling equipment requires routine preventative maintenance and service throughout its service life in order to yield maximum uptime with limited interruption.

Initiating a regular preventative maintenance program creates a proactive approach to limiting costly downtime and possibly preventing failures before they could occur. Often times, symptoms of an upcoming event can be pre-diagnosed, thus providing a proactive approach to system readiness. Critical components can be changed out before end of life to minimize downtime from unplanned events.

A routine service program is imperative to continuous system uptime and readiness.

Improves system uptime

Extends equipment life & ROI

Reduces unintended disruptions in your business

Maximizes system efficiencies

INSTALLATION SERVICES

Choosing the right Motivair solution for your facility is only the first step in a successful project. Once your new equipment arrives, it's important that it gets installed correctly and in a timely manner to keep the project on schedule and on budget. Incremental levels of installation services are available ranging from simple hanging of ChilledDoors to full Construction Management Services.

Advantages to using Motivair's installation services team

1

Single Point of Contact

4

Communication Plan

2

Regular Project Status Updates

5

Coordination of All Daily Activities

3

Project Scheduling

EXPERT INITIAL START-UP

When it comes to initial start-up of your new ChilledDoor, Coolant Distribution Unit or custom Chiller, trust the experts. CCGS's Certified Factory start-up technicians ensure that your equipment is installed correctly and to full product specifications to make sure you get optimized performance from your investment.

Using Factory Certified start-up technicians is strongly recommended to ensure full product warranty coverage and that technicians are scheduled within the system to coincide with your project timeline.

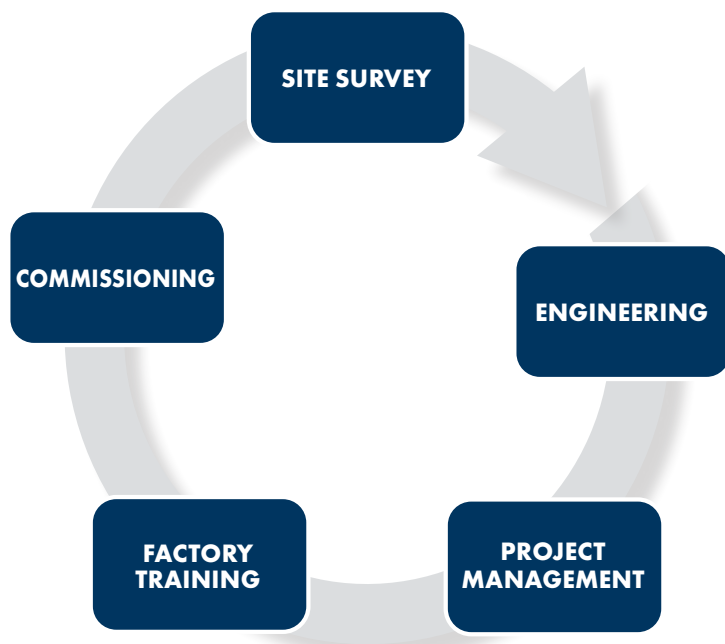

ON SITE, EXPERT, START-UP SUPPORT

- **Advance scheduling of technician on site**
- **Pre-Startup checklist ensures product has been installed correctly**
- **Multi-point start-up procedure**
- **Powered up run test ensures all components are operating per factory specification**
- **Client sign off ensures full customer satisfaction**

ADDITIONAL SERVICES

SITE SURVEY

Site visit enables the design and construction team to work each facility's unique needs.

ENGINEERING

Full Electrical, Mechanical, Architectural and Structural services

PROJECT MANAGEMENT

Complete control of all aspects of the project scope for a seamless turnkey implementation.

FACTORY TRAINING

On site or factory based in depth client training on system operation, PLC controls and general maintenance requirements.

COMMISSIONING

System commissioning support available as a standalone service or to be coordinated with client's specified commissioning agent.

SERVICE PLANS & EXTENDED WARRANTIES

Preventative Maintenance

Maintaining critical equipment is important to ensure reliable operation and optimal product efficiencies. Having a Preventative Maintenance program in place allows you to address potential problems before they occur and schedule solutions to coincide with your site requirements.

Our CCGS team can provide you with a comprehensive description of the services entailed with a certified Preventative Maintenance program to allow for complete transparency between you and your CCGS service team. The preset costs of coverage allow you to budget accordingly for your system maintenance on an annual basis.

Extended Parts Warranty

Depending on your warranty coverage needs, comprehensive parts coverage can be extended out from 2 to 5 years from the date of original purchase. Extended Parts Warranty coverage can be pre-purchased any time prior to authorized factory start-up through your authorized Motivair partner. Extended Parts Warranties require a CCGS Preventative Maintenance program to be maintained throughout the warranty period. Choosing to extend your parts warranty coverage offers a simple and cost effective way to avoid unexpected expenses should an event occur requiring parts to be replaced.

PREVENTATIVE MAINTENANCE:

An investment in uptime and peace of mind.

- **1st Year All Parts Warranty Included**
- **Optional 2nd - 3rd Year Extended Parts Warranty**
- **Optional 3rd - 5th Year Extended Parts Warranty**

NOTES

COMPREHENSIVE COOLING SOLUTIONS

Cooling critical industries. Impacting the world's most advanced technologies.

ABOUT US

Motivair Cooling Solutions enables industry leaders to push the boundaries of what's possible by leveraging over 30 years of insights and innovations creating dependable mission critical cooling systems.
